

The MRS Advantage

Underwriting Solutions

Tele Underwriting

Professional, Efficient, Customizable.

We can improve your underwriting by completing Part I/Part II of the application, procuring additional requirements based on your rules, interfacing with paramedical providers, and eliminating redundancies.

Our customizable underwriting services allow each client to develop a flexible program that complements their existing workflow. We will work with you to identify opportunities for increased efficiency and fewer applicant touches. We have the ability to integrate with MIB and Rx records to streamline the process and configure interview questions in real time.

MRS is available when you need us. Evenings, weekends, or during promotional volume increases; we can fill in the gaps.

Our Staff Represents Your Company; a statement we deliver with pride.

MRS Tele-Underwriting is conducted by our professional and courteous staff with years of experience. All staff must complete a comprehensive training program which covers: important industry issues, medical terminology, and underwriting concerns regarding specific medical and non-medical risk factors. Team members receive regular updates on the latest industry news and trends, ensuring they are knowledgeable about current issues.
